The latest and not so greatest is on there. However, Dana Tullis mandated that we separate plans into R6 and R4 exclusively and also separate air from water/sediment.

That is happening now. The updated "current" plan which is already obsolete is attached.

Now I need you to help me. I NEED you to get me some Sitrep information about what is happening in Unified Command. I am getting hammered for never having anything from you every day. Please help me out.

Thanks.

Paige:

Could we make sure that we have posted on the osc website the EPA sampling plans that are final. I need a place to go to get the latest and greatest.

Thanks
